STUDY GUIDE · TEST AND EXAM PREPARATION

History of

Uzbekistan

Weeks 1–4 All the savollar, topshiriqlar, testlar and atamalar from the lectures, slides, course documents and the textbook «Ўзбекистоннинг энг янги тарихи» (2024) — with model answers, full translation and the key terminology of every week.

Compiled for the students of the Tashkent University of Technology

OCTOBER 2026

Contents

1 Course map, sources and how to use this study guide 3
1.1 Weeks 1–4 and the course files . . . 3

2 Week 1 — The Subject Matter of History 4
2.1 Key points (the “all the rules” of the week) . . . 4
2.2 Savollar — lecture questions with model answers . . . 7
2.3 Testlar — lecture tests with correct answers . . . 8
2.4 Atamalar — weekly glossary . . . 9

3 Week 2 — Central Asian Civilization and Early Technological Achievements 11
3.1 Key points (the “all the rules” of the week) The concept of civilization . . 11
3.2 Savollar — lecture questions with model answers . . . 13
3.3 Testlar — lecture tests with correct answers . . . 14
3.4 Atamalar — weekly glossary . . . 16

4 Week 3 — History of Uzbek Statehood and the Formation of the Republic of Uzbekistan 17
4.1 Key points (the “all the rules” of the week) The Concept of Statehood . . 17
4.2 Savollar — lecture questions with model answers . . . 20
4.3 Testlar — lecture tests with correct answers . . . 21
4.4 Atamalar — weekly glossary . . . 22

5 Week 4 — The Gaining of Independence by Uzbekistan and the Challenges of State-Building 24
5.1 Key points (the “all the rules” of the week) Uzbekistan under Soviet Power 24
5.2 Savollar — lecture questions with model answers . . . 27
5.3 Testlar — lecture tests with correct answers . . . 29
5.4 Atamalar — weekly glossary . . . 29

6 The 2024 textbook: savol va topshiriqlar and tayanch so‘zlar 31
6.1 Topic 1. The discipline «The Newest History of Uzbekistan»: subject, aim and tasks (→ week 1) . . . 32
6.2 Topic 2. The historical foundations of independence: civilization, statehood, Jadidism (→ weeks 2–3) . . . 33
6.3 Topic 3. Socio-political processes in Uzbekistan on the eve of attaining independence (→ week 4) . . . 35
6.4 Topic 4. The formation of the independent Republic of Uzbekistan and its historical significance (→ week 4) . . . 36

7 Cheat sheet: key dates and numbers **39**
7.1 Key dates 39
7.2 Key numbers and figures 40

1 Course map, sources and how to use this study guide

History of Uzbekistan, code CC-MOHU010106, Tashkent Technological University, Faculty of Power Engineering. Compulsory module, 4 ECTS, autumn semester 2026/2027; coordinator — Dr Vohid Kholov. Workload: 30 contact hours of lectures (2 h per week, 15 weeks) + 90 hours of independent work = 120 hours.

Assessment: Midterm — written, 1–2 hours, 30% (ILOs 1–5); project presentation — written and oral, 10–15 minutes, 20%; final exam — written, 1–2 hours, 50%. Scale: $90-100 = A$ (excellent), $75-89 = B$(good), $60-74 = C$(satisfactory), $0-59 = D$(unsatisfactory). Attendance of at least 75% of classes is required for admission to the final exam.

Planned learning outcomes (ILOs): (1) Understanding — explain the basic concepts of history, statehood, and the role of science and technology in the development of the country; (2) Analysis — analyze Uzbekistan's contemporary policy in retrospect; (3) Selection — select qualitative and quantitative data and the methods of Orientalism, oral history, source analysis, hermeneutics, anchoring in place and time; (4) Evaluation — judge political changes and reforms: openness and transparency, a multi-vector foreign policy, socially oriented policy; (5) Application — work in small groups on projects and present historical processes in writing and orally.

1.1 Weeks 1–4 and the course files

Each course week corresponds to a set of files in the folder course-files/history-of-uzbekistan; all of them are covered in this study guide:

Week	Weekly topic	Course files
1	The Subject Matter of History	Lecture I (.doc) + slides The subject matter of History.pptx _ _ _ _
2	Central Asian civilization and early technological achievements	Lecture II (.doc) + slides Lecture II 2 .pptx _ __ _
3	History of Uzbek statehood; the formation of the Republic of Uzbekistan	Lecture III (.pdf) + _ Formation of Uzbekistan as a republic.pptx + _ _ _ _ _ Central Asian nations and border issues.pdf _ _ _ _ _
4	Uzbekistan's attainment of independence and the subsequent challenges of state building	Lecture IV (.docx) + slides LECTURE IV 3 .pptx +2024 _ _ __ _ textbook, topics 3–4

How to use the study guide: (1) start with the «Key Points» section of each week — it is the «all the rules» of the course in a condensed form; (2) work through the open questions (savollar) aloud with the answers covered, and check yourself against the model answers; (3) take all the tests (testlar) from the lectures — it is exactly these wordings that are used in the exams; (4) learn the glossary atamalar: the terms appear in definition questions and in the tests; (5) in chapter 6 check yourself against the original questions of the 2024 textbook; (6) before the exam review the table of dates and numbers from chapter 7.

All wordings of questions, tests and terms are taken verbatim from the course files and the textbook; the model answers are compiled from the lecture materials and verified against them. The original Uzbek texts of chapter 6 were obtained by OCR-processing of the textbook «Ўзбекистоннинг энг янги тарихи» (Mehr-nuri,

Tashkent, 2024; 408 pp.; authors R.Kh. Murtazaeva, K.D. Sayipova, A.A. Odilov, A.A. Yermetov).

2 Week 1 — The Subject Matter of History

Week files: Lecture_I__The_subject_matter_of_History.doc · The_subject_matter_of_History.pptx

Week 1 answers the questions: what is history as a science and as an academic discipline, what is its nature, which types and auxiliary disciplines are included in it, how primary sources differ from secondary ones, and by which methods historians verify the reliability of information. Below are gathered all the propositions, all the questions (savollar), all the tests (testlar) and all the terms (atamalar) based on the materials of the lecture and the slides.

2.1 Key points (the “all the rules” of the week)

The definition of history and its «raw material»

History — the study of the life of society in the past in all its aspects, in connection with the present and the expectations of the future; it is the story of man in time, an inquiry into the past on the basis of evidence. Evidence/fact is the «raw material» of teaching and studying history. History is an attempt to re-think the past: what happened, when and how.

The aim of the module is to help the student understand the modern social, political, religious and economic conditions of people’s lives: without knowledge of history there is no basis for understanding religion, customs, institutions and governance. History reveals cause-and-effect connections between the past and the present and makes it possible to understand problems at the national and international level accurately and objectively.

Key quotations about history (the authors must be known)

Burckhardt: «History is the record of what one age finds worthy of note in another».

Henry Johnson: «History in its widest sense is everything that has ever happened».

Smith, V.S: «The value and interest of history depend on the extent to which the present is illuminated by the past».

Rapson: «History is a connected account of the course of events or of the progression of ideas».

NCERT: «History is the scientific study of past events in all aspects of the life of a social group in the light of what is happening in the present».

Jawaharlal Nehru: «History is the story of man’s struggle through the ages against nature and the elements; against wild beasts and the jungle and against those of his own kind who tried to keep him down and exploit him».

Alisher Navoi: from history we know which ruler was cruel and who held the banner of justice; the qualities and shortcomings of every person are recorded in history.

Ibrat: knowledge of the history of the homeland is necessary for every inhabitant.

Abdurauf Fitrat: «History is the subject that studies the causes of the prosperity and the crisis of our people in the past».

Additional (slides): Voltaire — «History is the study of all the crimes of the world»; Robert Heinlein — «A generation which ignores history has no past and no future»;

Confucius — «Study history, study history: in history lie all the secrets of statecraft»; Napoleon — «History is a set of lies agreed upon»; Richard Paul Evans — «The more I study history, the more clearly I see how little humanity has changed: there are no new scenarios, only different actors».

The nature of history (11 propositions of the lecture)

1) The study of the present in the light of the past: the present has grown out of the past; causal connections are restored. 2) History is the science of man: the story of man's struggle through the ages, of how man learned to use and control his environment. 3) History is concerned with man in time: every event takes place at a definite moment of time, time gives perspective. 4) History is concerned with man in space: the interaction of man and his environment; politics, society, the economy and culture grow out of the geographical context.

5) An objective record of events: the data are built on primary sources and freed from subjective interpretation. 6) Many-sidedness: historical events cover all sides of life, not only the political one. 7) History is a dialogue between the events of the past and the gradually emerging ends of the future; on the basis of general laws attempts are made to forecast the future. 8) Not only narration but also analysis: causal connections are uncovered, general laws are formulated and compared with other societies.

9) Continuity and coherence are the necessary conditions of history: human progress is handed down from generation to generation. 10) Relevance: only events important for the understanding of modern life are included. 11) All-comprehensiveness: history is not limited to one period, one country or one nation and embraces the political, social, economic, religious, literary, aesthetic and physical sides of life — a sense of world unity.

Three key points for understanding the essence of history

Experience — a combination of positive and negative notions about man or the historical process, their analysis and interpretation. Thought — an idea or a point of view formed out of many facts: a preponderance of negative facts forms a negative thought, and vice versa. Fact/Evidence — the raw material of history: the study of what happened, when and how.

The most important conclusion of the lecture: contrary to common opinion, the most important thing is EXPERIENCE, then thought, and only then fact. The knowledge of many facts by itself does not mean the knowledge of history: without facts history turns into literature, but facts are merely instruments leading to reality.

The example of T. Welsford (Oxford): in the Samarkand archive a document of a petitioner to the qadi (judge) against a brother who would not divide the paternal land makes it possible to call the brother a bad man; but a second document shows that the brother offered his brother half the value of the land so that the latter could buy land elsewhere or take up trade — the income from the land was sufficient for only one family. Conclusion: one source distorts, several sources create an objective picture.

The role of the interpretant: «history is written by the victors». Governments and funds pay for the writing of history and want to read it the way they imagine it; historians depended on rulers. Therefore it is necessary to compare different data from different sources. Example: the colonizers justified invasions by «the introduction to civilization»; today the same processes are described by the words «democracy», «human rights», «feminism».

The example of Amir Timur (Timur): under Soviet rule he was studied mostly negatively under the influence of ideology, while in the years of independence his status was raised to that of a national hero — research showed that he developed trade, architecture, international relations and science. Similarly Genghis Khan: for us — a barbarian conqueror who ravaged flourishing cities, for the Mongols — a hero. Conclusion: the assessment of a historical figure depends on the position of the interpreter.

«Knowing history» versus «doing history»; types of history

Knowing history — the accumulation of information, «walking encyclopedias», collectors of facts «in a cupboard of knowledge». Doing history — interrogating the past in order to make sense of the world; historical research and historical thinking: working with competing versions and narratives, understanding «strangers in time», even if they are not strangers in space.

Types of history (slides): political, diplomatic, social, intellectual, cultural, economic history.

Disciplines included in history

Archaeology — the scientific study of the material remains of past human life: from the most ancient stone tools to modern discarded objects; from dwellings, temples and tombs to palaces and pyramids. The word comes from the Greek archaia («antiquities») + logos («teaching»). The archaeologist first describes and classifies the finds (objective taxonomy is the foundation of archaeology), but the main goal is to place the material remains in a historical context; in the end the archaeologist is a historian. Over 150 years large local and international excavations have been carried out in Central Asia, which have revealed the way of life, the origins, the trade and the economy of the region.

Ethnography and ethnology — from the Greek ethnos («people») + graphein («to write»); according to Wolcott (1999) this is the description of the «ordinary social behaviors» of a recognizable group of people. Ethnographers use the method of participant observation: the anthropologist studies the life of a group by taking part in its activities. Ethnological research is the «intellectual antivirus» of society: it cleanses it of rumors and superstitions (for example, the prohibition of washing floors at night, and the like).

Source studies — «trust but verify»: the authenticity of the information is determined, as well as the behaviour of the author, the language of the source, the character of the source, the style of writing; language changes, words change their meaning or fall out of use.

Historiography — the study of the methods of historians in developing history as an academic discipline; any body of historical work on a particular subject. Examples of subjects: the historiography of the Central Asian renaissance, of the Second World War, of the Middle Ages, of early Islam; genres include political and social history. Since the 19th century (with the development of academic history) a historiographical literature has taken shape; the question of the influence of the loyalties of the historian (for example, to the nation state) remains debatable.

Chronology — the science of the arrangement of historical events in time; it relies on chronometry (the measurement of time) and historiography. Its main task is the synchronization of events: to connect an event with the current time and to compare it with other events; a typical task is the synchronization of the reigns of tsars and rulers of different countries.

Numismatics — the scientific analysis of money and of the ways it has been used in history; also the collecting of coins, banknotes, tokens and medals. Numismatics helps to study the history of money, culture (symbols on coins), religion and beliefs, rulers and their times, the history of relations, metallurgy, mining, chemistry, drafting, physics and more.

Historical methodologies (techniques of presenting information)

Palaeography — the study of historical handwriting; diplomatics — the study of documents; the study of records and archives; chronology — the establishment of the dates of past events; the study of publications; epigraphy — the study of ancient inscriptions; genealogy — the study of people and families; historical geography; heraldry — the study of coats of arms and weapons; codicology — the study of handwritten books; numismatics — coins; sphragistics — the study of seals; the study of new media (historical digital literacy).

Primary and secondary sources

Primary sources — documents or artifacts created by a witness of or a participant in an event; testimonies created during the period under study. The list of the lecture: manuscripts and archival materials; books and pamphlets; data; dissertations and research results; ephemeral printed matter (cards, tickets, labels, as well as banknotes and marriage certificates); government documents; maps; objects and artifacts; oral history; magazines, newspapers and scholarly journals; sound recordings and visual materials. The collection and analysis of primary sources is the central part of historical research.

Secondary sources — created considerably later than the events described, or by a person who took no part in the events and was not their eyewitness; they include simple descriptions of primary sources without verbatim reproduction. These are books and articles on the subject, often with lists of sources (a bibliography) leading to other primary and secondary sources.

The historian’s methods: source criticism and synthesis

Source criticism / information evaluation — the process of evaluating the quality of a source: validity, reliability, relevance to the subject. Procedures for contradictory sources; principles for determining reliability; the testimonies of eyewitnesses; indirect witnesses; oral tradition; anonymous sources.

Five basic questions to ask of a source: When was the source created (date)? Where was it created (localization)? By whom was it created (authorship)? From what original material was it created (analysis)? In what original form (integrity)? What is the evidential value of its content (credibility)?

Synthesis — historical reasoning: objectivity, causality, chronology, historical context; the techniques are the «argument to the best explanation» and statistical inference.

2.2 Savollar — lecture questions with model answers

S1. What is the conceptual benefit of studying history?

Answer. History helps to explain the present: without knowledge of the past there is no basis for understanding religion, customs, institutions and governance. It develops analytical skills and critical thinking, forms an «intellectual immunity» in discussions, teaches how to reveal cause-and-effect connections between the past and the

present and how to assess national and international problems objectively. History is the foundation of all the humanities and social sciences, of philosophy, politics, economics, art and religion; different interpretations of the past allow one to see the present differently and to work for different versions of the future.

S2. Give quotations about history.

Answer. One must be able to give at least 2–3 quotations with their authors: Burckhardt — «the record of what one age finds worthy of note in another»; Henry Johnson — «everything that has ever happened»; Rapson — «a connected account of the course of events or the progression of ideas»; NCERT — «the scientific study of past events in the light of the present»; Nehru — «the story of man's struggle against nature and against oppressors of his own kind»; Navoi — history shows who was a cruel ruler and who held the banner of justice; Ibrat — knowledge of the history of the homeland is necessary for everyone; Fitrat — history studies the causes of the prosperity and the crisis of our people; Voltaire, Confucius, Napoleon, Heinlein — additionally (see the rules section).

S3. What is necessary in order to study and research history?

Answer. Facts-evidence from primary and secondary sources are necessary, as well as the knowledge of the methods: source criticism (date, localization, authorship, analysis of the material, integrity, credibility) and synthesis (objectivity, causality, chronology, context). Comparative and analytical skills are needed: to compare different sources about one event, to take into account the role of the interpretant («history is written by the victors»), to distinguish facts, thoughts and experience, where experience is the summit. The auxiliary disciplines are useful — archaeology, numismatics, chronology, source studies, ethnology, historiography.

S4. Which subjects (disciplines) are included in history?

Answer. Archaeology — the study of the past through excavations; chronology — the study of time and calendars; source studies — the study of written sources; numismatics — the study of coins; ethnology — the study of traditions; plus historiography as the study of the methods of historians. The methodologies also include palaeography, diplomatics, epigraphy, genealogy, heraldry, codicology, sphragistics and historical geography.

S5. What are the differences between primary and secondary sources?

Answer. A primary source was created by an eyewitness or a participant of an event during the period under study (manuscripts, archives, documents, maps, oral history, the contemporary press, artifacts). A secondary source was created considerably later than the event or by a person who took no part in it, and analyzes a scholarly question relying on primary sources (books and articles, bibliographies). The rules for secondary sources are simpler: they are always «after» the event and often describe primary sources without reproducing them verbatim.

2.3 Testlar — lecture tests with correct answers

T1. What do historians use in order to study, interpret, revise and reinterpret the past?

a) written documents, oral communications b) buildings, artifacts c) photographs, paintings d) all of the above is correct Answer: d) all of the above is correct

Explanation: The lecture lists directly: written documents, oral communication, buildings, artifacts, photographs, paintings — all forms of evidence.

T2. Find the author of the quotation: «History is the subject that studies the causes of the prosperity and the crisis of our people and the past».

a) Fitrat b) Ibrat c) J. Nehru d) Rapson Answer: a) Fitrat

Explanation: This formulation belongs to Abdurauf Fitrat.

T3. History is $a \ldots$ **between the events of the past and the gradually emerging ends of the future.**

a) a lock b) transport c) dialogue d) a curtain Answer: c) dialogue

Explanation: One of the 11 propositions on the nature of history: history is a dialogue between the past and the future.

T4. Which of the following is the raw material of history?

a) thought b) fact c) experience d) books Answer: b) fact

Explanation: Fact/evidence is the «raw material» of teaching and studying history; at the same time the highest value is experience.

T5. Which of the following CANNOT be a secondary source?

a) a newspaper b) archival documents c) manuscripts d) none of them Answer: d) none of them

Explanation: According to the classification of the lecture, the newspaper, archival materials and manuscripts are listed among primary sources — none of them is secondary.

T6. Which discipline studies history by means of coins?

a) ethnology b) numismatics c) archaeology d) chronology Answer: b) numismatics

Explanation: Numismatics is the scientific analysis of money and coins.

T7. What can numismatics study?

a) the history of metallurgy b) the names of rulers and the periods of their reigns c) the culture of peoples d) all of the above is correct Answer: d) all of the above is correct

Explanation: The lecture lists: the history of money, culture (symbols), religion, rulers and their times, metallurgy, mining, chemistry, physics and more.

2.4 Atamalar — weekly glossary

Term (atama)	Meaning
History	the study of the life of society in the past in all its aspects, on the basis of evidence; an attempt to re-think the past
Evidence / fact	the raw material of history: what happened, when and how
Experience	a combination of positive and negative notions about man or a process, their analysis and interpretation; the most important of the three key points
Thought	an idea or a point of view formed out of many facts
Fact	an instrument leading to reality; the basis for the formation of thought and experience
Interpretant	the position/factor influencing the interpretation of history («history is written by the victors»)
Types of history	political, diplomatic, social, intellectual, cultural, economic
Archaeology	the scientific study of the material remains of past human life; from the Greek archaia + logos
Ethnography	«writing about peoples»: the description of the customs of a group of people on the basis of field research
Participant observation	a method: the anthropologist studies the life of a group by taking part in its activities
Source studies	determining the authenticity of the information and the author, the language and the style of the source; «trust but verify»
Historiography	the study of the methods of historians; the body of historical work on a particular subject
Chronology	the science of the arrangement of events in time; the task is the synchronization of events

Term (atama)	Meaning
Chronometry	the measurement of time (timekeeping), the support of chronology
Numismatics	the scientific analysis of money and coins; studies rulers, culture, metallurgy, religion
Palaeography	the study of historical handwriting
Diplomatics	the study of documents, records and archives
Epigraphy	the study of ancient inscriptions
Genealogy	the study of individual people and families
Heraldry	the study of coats of arms and weapons
Codicology	the study of handwritten documents/books
Sphragistics	the study of seals
Primary source	created by a witness of/a participant in an event during the period under study: manuscripts, archives, maps, oral history, the press of that time
Secondary source	created considerably later than the event or by a non-eyewitness; analyzes a question relying on primary sources
Source criticism	the evaluation of the validity, reliability and relevance of a source
Synthesis	historical reasoning: objectivity, causality, chronology, context
Qadi (qadi)	a judge in a Muslim court (an example from the Samarkand archive in the lecture)
Ephemera	short-lived printed items: cards, tickets, labels; also banknotes, certificates

3 Week 2 — Central Asian Civilization and Early Technological Achievements

Week files: Lecture_II__Central_Asain_Civilization.doc · Lecture_II__2_.pptx

Week 2 proves that Turan/Turkestan is an integral part of world civilization: settled life, cities, art and irrigation arose here independently. One needs to know the concept of civilization, the Neolithic and Bronze Age cultures, the Neolithic Revolution and the waves of migrations. Below — all the propositions, questions, tests and terms of the lecture and the slides.

3.1 Key points (the “all the rules” of the week) The concept of civilization

Civilization — a complex human society, usually made up of different cities, with certain characteristics of cultural and technological development; an advanced state of human society with highly developed forms of government, culture, industry and common social norms. The word is connected with the Latin civitas («city»), so the basic definition is «a society made up of cities».

The best-known world civilizations: Egyptian, Babylonian, Chinese, Indian, Greco-Roman, Arab. However, the newest archaeological research in Central Asia has proved that the ancient development of the region is one of the centers of world civilization, which has been recognized by prominent world scholars. The term «civilization» was often used ethnocentrically: «civilizations» were considered morally

good and advanced, the rest — backward; therefore the definition remains debatable to this day.

The concept of Central Asia

The concept of «Central Asia» was first introduced into scholarship by A. von Humboldt in the 19th century during his journeys across the region. It should not be confused with Central Eurasia, which occupies a larger territory. Central Asia is a vast territory, also called Turkestan in the sources; it is almost the same geographical space: from Uyghuria to the Caspian basin, from the south of Siberia to Iran. The present geographical position of Central Asia is part of historical Turkestan, also known as Turan.

Politically, Central Asia embraces the territories of Uzbekistan, Kazakhstan, Kyrgyzstan, Tajikistan and Turkmenistan. In Soviet times the region was called «Middle Asia and Kazakhstan»; after the dissolution of the USSR all these countries came to be called Central Asia.

Early life and culture: the Palaeolithic and the Mesolithic

The occupation of the region began as early as the Lower Palaeolithic. Sources of knowledge: petroglyphs (rock drawings), wall paintings, tools of stone. In the Mesolithic the bow and arrows appeared — an important technological achievement of the epoch.

The Neolithic and Neolithic cultures

The 6th–5th millennia BC — the «revolution of mankind» (the Neolithic Revolution): the transition to an appropriating-and-producing economy almost simultaneously with Western Asia. There appear: the first settled economy, new branches of the economy, the building of houses, early crafts, settled agriculture, hunting and fishing, cattle breeding; comfortable houses with neat finishing, bright pottery, the wide use of ornament. This qualitative leap prepared the base for the creation of the ancient civilizations. At the same time the development was uneven: the tribes of Iran and southern Turkmenistan passed to the new forms of economy earlier, in other areas the transition was delayed; hunters, fishers and gatherers coexisted with the settled communities of the oases.

Jeitun (Djeitun) — a Neolithic site in southern Turkmenistan; settled approximately in 7200–4500 BC with possible short interruptions. It gave its name to the whole Neolithic period of the foothills of the Kopet Dag. Sheep and goats had already been domesticated, but the inhabitants supplemented their diet by hunting. Here, for the first time in the region, agriculture developed.

Kelteminar — a Neolithic culture of 5500–3500 BC of settled fishers of the semi-deserts and deserts of the Karakum and the Kyzylkum, the deltas of the Amu Darya and the Zeravshan. Named after the Kelteminar site; replaced by the Tazabagyab culture. People lived in huge houses ($24 \times 17m$, up to 10 m high) where the whole clan community of 100–120 people lived; they adorned themselves with beads of shells; they made stone axes and miniature trapezoidal flint arrowheads; they cooked in clay vessels without a potter’s wheel.

Hissar culture — a Late Neolithic culture (conventionally 7000–2000 BC) in the valleys of the Kafirnigan and Vakhsh rivers; an archaic culture of the tribes of the foothills and the mountain valleys, which developed simultaneously with the more developed settled-agricultural cultures (Anau, Jeitun).

The Bronze Age of Central Asia

The Bronze Age — the introduction of metallurgy: stone tools began to be replaced by metal ones; irrigation (artificial irrigation) and urban planning appeared in the economy; the alloying of metals, embroidery/ornamentation, proto-urban settlements.

The Early Eneolithic (the 5th — the beginning of the 4th millennium BC): the growth of the population of the foothills of the Kopet Dag; alongside small settlements of 0,5–1 hectares (Anau, Dashlyji, Yassy-depe) large centers of more than 10 hectares arose (Kara-depe, Namazga-depe). The early agricultural tribes spread eastward to the ancient delta of the Tejen (Gerirud) — the Geoksyur oasis.

The two pillars of the economy were agriculture and cattle breeding (livestock provided more than 4/5 of the meat consumed); pigs were also bred. The tools of the Anau IA complex are massive stone hoes; in the Namazga I complex — ring stones for hoe-like digging implements.

Bronze Age sites: Namazga I, Altyn-depe, Yalangach-depe, Mullali-depe, Kara-depe, Zamanbaba (the area of Bukhara), Sapalli, Jarkutan. Altyn-depe, Jarkutan and Namazga-depe are Bronze Age sites and proto-urban settlements.

The art of the ancient period

The culture of the Early Eneolithic testifies to the growth of everyday prosperity: almost a third of the clay pottery is painted with black paint on a red or yellowish background. In the Middle Eneolithic (the middle of the 4th millennium BC) the unified culture of the early agricultural communities of southern Turkmenistan split into a western and an eastern variant: the west is distinguished by multicoloured painted ware with geometric ornament in a red-and-black scheme (Anau, Kara-depe, Namazga-depe); in the east the ornaments are simpler and stricter — straight parallel lines along the rims of bowls and pots (Altyn-depe and the settlements of the Geoksyur oasis).

Migrations to Central Asia and the transfer of information

The waves of migrations named in the lecture: the migrations of the Indo-European peoples — the Iranians, the Indians; the migrations of the Jews; of the Turks; of the Arabs; of the Mongols. The Arabs came in the 7th–8th centuries. The mixing of the local inhabitants with newcomers of different ethnic groups led to the formation of diasporas and of tolerance towards different groups inside and outside the country.

Concluding theses of the slides (summary)

Tendencies of the intellectual, cultural and artistic development of the region; the beginning of settled life with agriculture, fishing, cattle breeding, primitive craft (pottery), the planning and the building of houses; adornment with special patterns, the mastering of copper, artificial irrigation; the alloying of metals, embroidery, proto-urban formations; the association of the local inhabitants with immigrants; the formation of diasporas; tolerance towards all inside and outside the country.

3.2 Savollar — lecture questions with model answers

S1. What is civilization?

Answer. Civilization is a complex human society, usually made up of cities, with certain characteristics of cultural and technological development; an advanced state of society with highly developed forms of government, culture, industry and common social norms. The word comes from the Latin civitas — «city», so the basic definition is «a society made up of cities». Early civilizations arose when people began to gather

in urban settlements; at the same time the criteria of being civilized are still disputed because of the ethnocentric use of the term.

S2. What are the primary centers (sites) of Central Asian civilization?

Answer. Neolithic: Jeitun (southern Turkmenistan, 7200–4500 BC — the first agriculture), Kelteminar (5500–3500 BC, the deltas of the Amu Darya and the Zeravshan — settled fishers with huge communal houses), the Hissar culture (the valleys of the Kafirnigan and the Vakhsh). Bronze Age: Anau, Namazga-depe, Kara-depe, Altyn-depe, the Geoksyur oasis, Yalangach-depe and Mullali-depe, Zamanbaba (the Bukhara oasis), Sapalli and Jarkutan — proto-urban centers with metallurgy and irrigation.

S3. What achievements were made in the Bronze Age?

Answer. The introduction of metallurgy — stone tools began to be replaced by metal ones; the development of artificial irrigation; the appearance of urban planning and proto-cities (Altyn-depe, Jarkutan, Namazga-depe); the growth of settlements (large centers of more than 10 hectares); a two-pillar economy — agriculture and cattle breeding; the development of applied art: painted pottery, geometric ornaments; the differentiation of the cultures into western and eastern variants.

S4. What are the distinguishing indicators between the Neolithic and the Bronze Age?

Answer. Neolithic (the 6th–5th millennia BC): the Neolithic Revolution — the transition to settled life, agriculture, cattle breeding, fishing, house building, early crafts, pottery without metallurgy; stone tools. Bronze Age: metallurgy (the replacement of stone by metal), irrigation, urban planning and proto-cities, further social stratification and the greater complexity of the settlements, the painted pottery of two schools. The key marker of the boundary is the appearance of metal and of cities.

S5. What do you know about the migrations to Central Asia?

Answer. The lecture singles out the waves: Indo-Europeans — Iranian tribes and Indians; Jews; Turkic tribes (their penetration in the 4th–6th centuries); the Arabs in the 7th–8th centuries (the bringing of Islam and subordination to the Arab Caliphate from 704); the Mongols (the 13th century). Each wave mixed with the local population, formed diasporas and strengthened tolerance; the migrants brought languages, technologies and forms of economy.

S6. Warm-up (slides): what do you understand by civilization? Which are the most popular world civilizations? Why is history divided into periods?

Answer. By civilization is understood a «society of cities» with a developed culture and technologies. The best known are: Egyptian, Babylonian, Chinese, Indian, Greco-Roman, Arab — and now the Central Asian one is also recognized. History is divided into periods (the Palaeolithic, the Mesolithic, the Neolithic, the Bronze Age, etc.) because the change of tools, of economy and of the forms of society provides convenient boundaries for comparing the stages of the development of mankind.

3.3 Testlar — lecture tests with correct answers

T1. Civilization is …

a) an advanced state of society b) the end of migrations c) capitalism d) a developed economy Answer: a) an advanced state of society

Explanation: The definition of the lecture: an advanced state of society.

T2. Which culture developed in the deltas of the Amu Darya and the Zeravshan?

a) Jeitun b) Hissar c) Kelteminar d) Chust Answer: c) Kelteminar

Explanation: The Kelteminar culture occupied the semi-deserts of the Karakum and the Kyzylkum and the deltas of the Amu Darya and the Zeravshan.

T3. Find the place where agriculture first developed in Central Asia.

a) Jeitun b) Hissar c) Kelteminar d) Chust Answer: a) Jeitun

Explanation: Jeitun is the most ancient agricultural site of the foothills of the Kopet Dag.

T4. Altyn-depe, Jarkutan, Namazga-depe are ...

a) Neolithic cultures b) Bronze Age sites c) proto-urban settlements d) b and c Answer: d) b and c

Explanation: According to the test key both are correct: these are Bronze Age sites and proto-urban settlements.

T5. The Zamanbaba culture developed in the area of ...

a) Bukhara b) Tashkent c) Samarkand d) Termez Answer: a) Bukhara

Explanation: Zamanbaba is the Bronze Age of the Bukhara oasis.

T6. The people who migrated to Central Asia in the 7th–8th centuries are ...

a) the Jews b) the Indians c) the Greeks d) the Arabs Answer: d) the Arabs

Explanation: The Arab conquests began in 704 — the 7th–8th centuries.

3.4 Atamalar — weekly glossary

Term (atama)	Meaning
Civilization	a society of cities with a developed culture and technologies; from the Latin civitas
Central Asia	the term of A. von Humboldt (19th century); between Uyghuria and the Caspian, from the south of Siberia to Iran
Turkestan / Turan	the historical name of the region embracing present-day Central Asia
Petroglyphs	rock drawings — a source of knowledge about the Palaeolithic
Palaeolithic / Mesolithic	the Old Stone Age and the Middle Stone Age; in the Mesolithic the bow and arrows appeared
Neolithic Revolution	the transition to a producing economy (agriculture, cattle breeding) in the 6th–5th millennia BC
Jeitun	a Neolithic site of southern Turkmenistan, 7200–4500 BC; the name of a whole culture of the Kopet Dag; the first agriculture
Kelteminar	a Neolithic culture of 5500–3500 BC of settled fishers of the deltas of the Amu Darya and the Zeravshan; houses of $24 \times 17m$ for 100–120 people
Hissar culture	the Late Neolithic (7000–2000 BC) of the valleys of the Kafirnigan and the Vakhsh
Tazabagyab culture	replaced the Kelteminar culture
Bronze Age	the epoch of metallurgy: stone tools are replaced by metal ones; irrigation and proto-cities
Eneolithic	the Copper-Stone Age; the Early Eneolithic — the growth of the foothills of the Kopet Dag (Anau, Kara-depe, Namazga-depe)
Anau	the eponymous settlement of the Eneolithic of southern Turkmenistan; the Anau IA complex with stone hoes
Namazga-depe	a large (more than 10 hectares) Eneolithic center; the Namazga I complex with ring stones of digging hoes
Altyn-depe	Bronze Age: a proto-city of the eastern variant of the culture
Jarkutan	a proto-urban settlement of the Bronze Age (southern Uzbekistan)
Sapalli	a Bronze Age site in southern Uzbekistan
Zamanbaba	the Bronze Age of the Bukhara oasis

Term (atama)	Meaning
Geoksyur oasis	the eastern variant of the culture in the ancient delta of the Tejen; simple ornaments along the rims
Kopet Dag	a mountain system whose foothills are the cradle of the Jeitun culture
Migrations	the waves: Iranians, Indians, Jews, Turks, Arabs (7th–8th centuries), Mongols
Diaspora	a community of people from another ethnic group; a result of migration mixtures
Tolerance	the concluding thesis of the lecture: the coexistence of all groups inside and outside the country

4 Week 3 — History of Uzbek Statehood and the Formation of the Republic of Uzbekistan

Week files: Lecture_III__History_of_Uzbek_Statehood.pdf · Formation_of_Uzbekistan_as_a_repub
.

Central_Asian_nations_and_bonders_issues__1_.pdf

Week 3 spans about 3000 years of statehood: from the first proto-states of Northern Bactria to the khanates, the Russian conquest, the national-territorial delimitation of 1924 and the border issues of the present day. This is the block most saturated with factual material: forms of states, titles of rulers, the diwan system of the Samanids, the Timurids, the terminology of border-making. Below are all the rules, questions, tests and terms.

4.1 Key points (the “all the rules” of the week) The Concept of Statehood

The history of statehood — the formation of political entities, the transformation of adats and tribal-clan forms into definite legal structures under a specific ruler and system. Tribal-clan forms — control over a territory with limited regulation; transformation into statehood — the unification of different peoples and tribes on the basis of a more developed legal process. Statehood on the territory of Uzbekistan developed for about 3000 years; the first sprouts appeared in Khorezm (Khwarazm) after the development of urban construction. The history of statehood is divided into sovereign and dependent periods; the form of statehood was mostly a monarchy until 1920, therefore it is studied in the chronological order of dynasties.

A state — a political entity of society created according to definite rules. Modern statehood — a way of the political organisation of ”society”; the state — the main agent forming the representation of society; nation-states — the organisation of people and territory into formally comparable sovereign governing units. The emergence of statehood in the world goes back to the Chalcolithic (the Copper-Stone Age) in Egypt and Mesopotamia (the IV–III millennia BC). In the formation of states, both autochthonous (local) and externally created ones are encountered.

The Six Periods of the Ancient Statehood of Turkestan

The 1st period: the development of early state forms in Northern Bactria in the second half of the II millennium BC. The 2nd: the beginning of the I millennium BC — the end of the VI century BC — the formation of the states of Bactria, Sogd and Khorezm. The 3rd: the early V century BC — 329 BC — the control of the Achaemenids. The 4th: the end of the IV century — the end of the II century BC — the coexistence of the Hellenistic states, Khorezm and Kangju (Kangüy). The 5th: the end of the II century BC — the I century AD — the Kushan kingdom. The 6th: the I–III centuries — the development and growth of ancient statehood, its final stage in antiquity.

The Primary States

Turkestan — a special historical-geographical and historical-cultural region, where civilisations existed for millennia thanks to two great rivers — the Amu Darya and the Syr Darya.

Bactria: present-day Afghanistan, the south of Uzbekistan and Tajikistan; the capital is Bactra. In the second half of the II millennium BC proto-cities arose here, which

later consolidated into the Ancient Bactrian kingdom; in the VI century it was occupied by the Achaemenids, then by Alexander the Great; later — the capital of the Greco-Bactrian kingdom, until the Tocharians came.

Sogd: central Uzbekistan; the capital — present-day Samarkand. In the VI–IV centuries BC — a satrapy of the Achaemenids; in 329 BC it was attacked by Alexander the Great and conquered two years later.

Khorezm: it developed on the territory of present-day Khorezm; in the VII century — the centre of Great Khorezm. At the end of the VI century BC it was occupied by the Achaemenids, but Alexander the Great did not attack it — its ruler was wise in foreign policy; it preserved its independence until the Arab conquest.

Dayuan: a state of the Fergana Valley; Zhang Qian noted 70 large and small cities.

Forms of States and Titles of Rulers

By genetic structure, states are divided into autochthonous (Kangju, Khorezmia) and externally created (the Achaemenid Empire, the Greco-Bactrian kingdom). By typology: a kingdom with the form of government ”absolute monarchy” (the Achaemenids, Greco-Bactria); a theocratic monarchy — the Kushan kingdom; a confederative kingdom with a limited monarchy — Kangju (no fewer than 5 possessions and the Great Yuezhi); a domain — the hereditary power of tribal leaders and heads of clans.

Titles of rulers: the Indian factor — Bago pauro (”Son of God”) in Bactria; the Iranian factor — shahanshah (”king of kings”); kavi — good princes; satar — the ruler of a region or country; dakhi — ”lord of all regions”; yabgu — a ruler (a Turkic title); amir; sultan; khan; emperor. The appearance of the title ”amir” is connected with the Islamic system of governance; ”khan” came with the Turks; dynasties sought legitimacy by tracing their lineage to Genghis Khan for the sake of the title of khan.

Medieval Statehood

The IV–VI centuries — the penetration of the Turks, migrations; the military raids of the Chionites under the leadership of Grumbates; Sogdian coins with the image of an archer and the word kydr (Kidara); the Hephthalites — from the middle of the V to the middle of the VI century squeezed between Sasanid Iran and the Turks; the murder of the Turkic ambassador on the territory of the Hephthalites; the joint attacks of the Turkic Khaganate and the Sasanids liquidated the power of the Hephthalites.

Khorezm as an independent country was created by Afrig in the IV century (the Afrigid dynasty). The VI — early VIII centuries — the period under the Turkic Khaganate. The year 704 — the beginning of the Arab attacks on Central Asia and of the subordination to the Arab Caliphate.

Dynasty-states: the Samanids, Karakhanids, Ghaznavids, Seljuks, Khwarazmshahs, Timurids.

The System of Governance of the Samanids (important for tests!)

The head of the state — the emir (Amir); the provinces were governed by governors appointed by him. Together with the royal court (dargah — legislation and the judicial system), ten centralised military-civilian departments (diwans) operated.

The main diwan — the diwan of the vizier: it controlled all the administrative, political and economic institutions. The diwan of the mustawfi — financial affairs. The diwan of amid al-mulk — diplomatic relations and the most important state papers. The diwan of sahib ash-shurta — the royal guard and military affairs. The diwan of sahib al-barid — the state post and the secret surveillance of local rulers and officials. The diwan of the muhtasib — markets, measures and weights, trade, later public morals.

The diwan of the mushrif — the control of revenues and expenditures and other state affairs. Also the diwans of judicial affairs, state lands and waqf (charitable) lands; in the localities — organs of all the diwans.

The Timurids

Timur besieged Balkh: the fortifications were breached, Amir Husayn was defeated, and on 10 April 1370 Timur came to power. He proclaimed the Chinggisids Suyurgatmish and Sultan Mahmud titular khans — an example of a limited monarchy, of the monarch as a symbol of the unity of the nation.

Amir Timur conducted military campaigns to strengthen the empire: the army occupied 10 million sq. km — from Eastern Turkestan to the Mediterranean Sea in the west, from Siberia to the Indian Ocean. The last great design was the campaign against China, interrupted by the death of the ”conqueror of the world” in 1405 at the age of 70.

From the Shaybanids to the Khanates

The division into small states: the Shaybanids, Ashtarkhanids, the Bukhara Emirate, the Khanate of Khiva, the Khanate of Kokand. It was precisely these three states (Bukhara, Khiva, Kokand) that were conquered by the Russian Empire in the second half of the XIX century.

The National-Territorial Delimitation of 1924 and ”Nation-building”

In the 1920s, after the world war, the revolutions and the national movements, there came the era of purposeful nation-building. The Soviet state created five republics in stages: the Kazakh, Kirghiz, Uzbek, Tajik and Turkmen ones. The pan-Turkic dream of the Jadids of a single Turanian state with a single language was shattered into five national states, of which four are Turkic-speaking and one (Tajikistan) is Persian-speaking. The principles of ”language nationalism” were applied: to define a territory by language and the supposed common history, to name the population a single people and give it a single state. This operation is known as the national-territorial delimitation of 1924.

Exceptions to the principles: Kazakhstan consisted of Kazakhs and Russians in roughly equal shares, and both were minorities — this is an example of a ”titular nationality”; in Uzbekistan the Karakalpak Autonomous Republic was set apart for a different language, in Tajikistan — Badakhshan; important minorities remained in each republic. The Soviet system promoted the Turkic languages and Tajik into modern languages, ensured universal literacy and administrative use; it was accompanied by ”korenizatsiya” — the preferment of local cadres in party and state structures. The new nations were built from above and from below, but without sovereignty — under the ideological homogenisation of the CPSU; the party leaders became the national leaders of the republics, which in 1991 turned the republics into nation-states.

Border-Making Terms (Central Asian Nations & Border Issues)

The terminology of boundary establishment: treaty, delimitation, demarcation, delineation.

Treaty: according to Article 102 of the UN Charter — a general term for all instruments binding under international law concluded between two or more international legal persons, regardless of their formal designation. The Vienna Convention (1969): ”an international agreement concluded between states in written form and governed by international law, embodied in one or several related instruments, whatever its particular designation”.

Delimitation — a legal process in which two sovereign states establish and describe in writing the location of their common border, mostly as a result of decision-making at the negotiating table. Demarcation — a field operation: the marking of the position of the border on the ground so that it is visible to everyone; it begins with topographic surveying; the goal is to establish physical signs that accurately represent the delimited border. Delineation — the graphic or mathematical representation of the border; often one and the same joint commission conducts both demarcation and delineation.

Uzbekistan–Kazakhstan negotiations: the longest borders of Uzbekistan; settlements crossed by the border without inviolable areas in the north of the Tashkent and Syrdarya regions; different chosen paths of development (protectionism — Uzbekistan, liberalisation — Kazakhstan). Negotiations with Kyrgyzstan: borders through the most densely populated regions — the Tashkent, Namangan, Andijan and Fergana regions; three enclaves of Uzbekistan; disputes and confrontations in the water sphere.

The benefits of solving delimitation: stable and mutually agreed borders on the basis of international norms, the development of transit, partnership in the strategic sectors — energy, agriculture, industry. The research hypotheses: H1 ”win–win” — stable borders serve the prosperity of mutual relations; H2 — a reliable border policy can make the country a centre for discussing problems at the international level. The methods: policy analysis, discussions in social media, surveys, comparative analysis, the systems approach; an obstacle — part of the archival materials is still secret. The proposals: joint institutes of strategic research, benefits for entrepreneurs, new methods of delimitation policy, the opening of transport corridors, mutual support of the inviolability of borders, funds for joint scientific projects.

4.2 Savollar — lecture questions with model answers

S1. What do you understand by the state?

Answer. The state — a political entity of society created according to definite rules: the unification of peoples and tribes under a more developed legal process, in contrast to tribal-clan forms with their limited regulation (adats). The modern state — the main agent of organising society and territory into sovereign governed units; it not only traditionally governs, but also produces laws regulating power over territory and trade, and shapes the forms of subjectivity of citizens through the definition and categorisation of the population.

S2. What are the stages (phases) of the development of states?

Answer. In Turkestan six periods of ancient statehood are distinguished: (1) early state forms of Northern Bactria — the second half of the II millennium BC; (2) the I millennium — the end of the VI century BC — Bactria, Sogd, Khorezm; (3) the V century — 329 BC — the Achaemenids; (4) the end of the IV century — the end of the II century BC — the Hellenistic states + Khorezm and Kangju; (5) the end of the II century BC — the I century AD — the Kushans; (6) the I–III centuries — the flourishing and finale of ancient statehood. Next come the medieval states — the Samanids, Karakhanids, Ghaznavids, Seljuks, Khwarazmshahs, Timurids — and the khanates.

S3. What do you know about the titles of rulers?

Answer. Bactria — Bago pauro (”Son of God”, the Indian factor); Iran — shahanshah (”king of kings”); kavi — good princes; satar — the ruler of a region; dakhi — the lord of all regions; yabgu — a Turkic title of a ruler; amir and sultan — Islamic titles;

khan — a Turkic title; emperor. Dynasties sought to trace their lineage to Genghis Khan for the legitimation of the title of khan; Timur ruled in the name of the titular Chinggisids (Suyurgatmish, Sultan Mahmud).

S4. What are the types of state formations?

Answer. By genetics: autochthonous (Kangju, Khorezmia) and external (the Achaemenids, Greco-Bactria). By typology: a kingdom — an absolute monarchy (the Achaemenids, Greco-Bactria); a theocratic monarchy (the Kushans); a confederative kingdom — a limited monarchy (Kangju: no fewer than 5 possessions + the Great Yuezhi); a domain — the hereditary power of clan leaders.

S5. What factors led to the crisis of large and strong countries?

Answer. Political instability, internal wars and the struggle for the throne, the disloyalty of personnel (officials); these factors weakened states, making them easy prey for external forces; the people lost trust in and loyalty to rulers and dynasties because of the instability. The lesson of the lecture: the drawbacks of political instability are equally ruinous for ancient states and for modern ones.

S6. Questions of the Formation slides: what do you understand by the state? types of formations? factors of crisis?

Answer. The same five questions of lecture III (see above) are repeated on the slides of Formation of Uzbekistan as a republic: the concept of the state, the stages of development, the titles, the types of formations, the factors of crisis — this is the mandatory minimum of week 3.

4.3 Testlar — lecture tests with correct answers

T1. The form of the state of Kangju was …

a) absolute monarchy b) confederative c) domain d) khanate Answer: b) confederative

Explanation: Kangju — a confederative kingdom with a limited monarchy (no fewer than 5 possessions and the Great Yuezhi).

T2. The title ”yabgu” belongs to …

a) the Turkic peoples b) the Greeks c) the Persians d) the Aryans Answer: a) the Turkic peoples

Explanation: Yabgu — a Turkic title of a ruler.

T3. In which state did the diwans perform the functions of executive power?

a) Bukhara Emirate b) Timurids c) Turkic Khaganate d) Samanids Answer: d) Samanids

Explanation: The ten diwans of the Samanids — military-civilian departments under the main diwan of the vizier.

T4. The practice of appointing a khan with limited power, when another person governed the country, was followed by …

a) Ismail Samani b) Amir Timur c) Amir Alimkhan d) Mirza Ulugbek Answer: b) Amir Timur

Explanation: Timur proclaimed the Chinggisids Suyurgatmish and Sultan Mahmud titular khans — a limited monarchy.

T5. Find the dynasty that ruled Transoxiana before the Shaybanids and after the Mongols.

a) Timurids b) Manghits c) Khwarazmshahs d) Samanids Answer: a) Timurids

Explanation: After the Mongols and before the Shaybanids, Transoxiana was ruled by the Timurids.

T6. Which of the authors gave detailed information on the history of Khorezm?

a) Narshakhi b) Clavijo c) Beruni d) Fitrat Answer: c) Beruni

Explanation: Abu Rayhan Beruni — the author of the ”Chronology of Ancient Nations” and of the history of Khorezm.

T7. Suyurgatmish and Sultan Mahmud were … in Timur’s state.

a) puppet rulers b) heirs to the throne c) prime ministers d) atalyks Answer: a) puppet rulers

Explanation: Titular (puppet) Chinggisid khans with real power held by Timur.

4.4 Atamalar — weekly glossary

Term (atama)	Meaning
Statehood	the formation of political entities: from adats and clan forms to legal structures
Adats	the customary law of tribal forms of governance
Autochthonous state	created by the efforts of the indigenous population (Kangju, Khorezmia)
Externally created state	created by conquerors (the Achaemenid Empire, Greco-Bactria)
Absolute monarchy	a kingdom with the full power of the monarch (the Achaemenids, Greco-Bactria)
Theocratic monarchy	a monarchy with religious legitimisation (the Kushan kingdom)
Confederative kingdom	a union of possessions under a limited monarchy (Kangju + the Great Yuezhi)
Domain	the hereditary power of tribal leaders and heads of clans
Bactria	an ancient state (Afghanistan, the south of Uzbekistan and Tajikistan), capital Bactra
Sogd	a state of central Uzbekistan, capital — present-day Samarkand; an Achaemenid satrapy
Khorezm (Khwarazm)	a state of the lower Amu Darya; preserved its independence from Alexander the Great
Dayuan	a state of the Fergana Valley; 70 cities according to Zhang Qian
Satrapy	a province of the Achaemenid Empire under the rule of a satrap
Bago pauro	”Son of God” — a title in Bactria (the Indian factor)
Shahanshah	”king of kings” — an Iranian title
Kavi	”good princes” — a title
Satar	the ruler of a region or country

Term (atama)	Meaning
Dakhi	”lord of all regions”
Yabgu	a Turkic title of a ruler
Amir / sultan / khan	Islamic and Turkic titles of heads of states
Hephthalites	a power of the mid V — mid VI century, squeezed between the Sasanids and the Turks
Chionites	nomads; raids under Grumbates
Afrigids	a dynasty of Khorezm from the IV century (founder Afrig)
Turkic Khaganate	the power of the Turks of the VI — early VIII centuries
Dargah	the royal court of the Samanids: legislation and the judicial system
Diwan	a department of executive power; the Samanids had 10 diwans
Vizier	head of the main diwan: administrative, political, economic institutions
Mustawfi	the diwan of financial affairs
Amid al-mulk	the diwan of diplomacy and important state papers
Sahib ash-shurta	the diwan of the royal guard and military affairs
Sahib al-barid	the diwan of state post and secret surveillance of rulers and officials
Muhtasib	the diwan of markets, measures and weights, trade, later — morals
Mushrif	the diwan of the control of revenues and expenditures
Waqf	charitable (dedicated to religious purposes) landholding
Karakhanids / Ghaznavids / Seljuks / Khwarazmshahs	medieval dynasties after the Samanids
Titular khan	a nominal khan under the actual ruler (Suyurgatmish, Sultan Mahmud under Timur)
Limited monarchy	the monarch as a symbol of national unity while power belongs to another person
Shaybanids / Ashtarkhanids	dynasties of the Uzbek khanates after the Timurids
Bukhara Emirate / Khanate of Khiva / Khanate of Kokand	the three states conquered by the Russian Empire
Nation-building	the creation of nations and republics by the Soviet authorities in the 1920s
Titular nationality	the people who gave the republic its name, even if they are a minority (Kazakhstan)
Korenizatsiya	the preferment of local cadres in party and state structures
National-territorial delimitation of 1924	the division of Central Asia into 5 national republics
Treaty	a binding international instrument (Article 102 of the UN Charter; the Vienna Convention of 1969)
Delimitation	the legal, written establishment of the border line by agreement

Term (atama)	Meaning
Demarcation	the field marking of the border with physical signs
Delineation	the graphic/mathematical representation of the border
Enclave	a territory of one state inside another state (3 enclaves of Uzbekistan at the border with Kyrgyzstan)
Inviolable area	a protected strip along the border; absent in the north of the Tashkent and Syrdarya regions

5 Week 4 — The Gaining of Independence by Uzbekistan and the Challenges of State-Building

Week files: Lecture_IV.docx · LECTURE_IV__3_.pptx · textbook «Ўзбекистоннинг энг янги тарихи» (2024), topics 3–4

Week 4 — the Soviet period and the path to independence: nation-building republics, four waves of repression, collectivisation and the cotton monoculture, the contribution to the victory over fascism, the plundering of resources, perestroika, the Declaration of Independence and its proclamation. Below are all the provisions, questions, tests and terms.

5.1 Key points (the “all the rules” of the week) Uzbekistan under Soviet Power

The USSR sought to create a legal basis for the sovereign rights of the national republics, which existed only conceptually: the constitution of 1924 proclaimed the voluntary principle of the federal structure of the USSR; the constitution of the Uzbek SSR (March 1927) declared the republic an equal-in-rights and sovereign component of the USSR. The government was headed by Fayzulla Khodjayev, who strove to advance the interests of the local population: the share of Uzbeks in the central organs grew from 23% to 32.3% (1924–1928), at the lower levels of the state apparatus it reached 75% by the end of 1930; the use of the Uzbek language in record-keeping expanded.

However, the USSR methodically intensified hyper-centralisation: from the end of the 1920s to the middle of the 1930s a totalitarian administrative model with the ideologisation of the economy and a rigid centralisation of governance took root in Uzbekistan. From the 1920s to the 1990s the region existed as a raw-material appendage: the centuries-old dynastic statehood was replaced by ”nation-building” states that sowed ethnic conflicts; the characteristic features of the period — repression, the cult of personality, the absence of private entrepreneurship, the suppression of freedom of speech.

Collectivisation and Industrialisation

The curtailment of the NEP and the return to the methods of ”war communism” created a bureaucratic command system of governing society. In the second half of the 1930s the dictatorship of Stalin established itself: the soviets became a decoration of the party’s monopoly on power, the party and the state merged into a single apparatus, the institutions of civil society were destroyed, and they were replaced by pseudo-social organisations. The ideological justification of global coercion — Stalin’s formula about the sharpening of the class struggle on the path to socialism.

Collectivisation was carried out forcibly: dehkans were driven into kolkhozes under the threat of deprivation of land, water and food; those who resisted were ”dekulakized” — their property was confiscated and they were deported. In 1930–1933, 40 000 dehkan households were ”dekulakized” and 31 700 dehkans repressed (deportation to 17 special settlements or beyond the borders of the republic — to the North Caucasus, Ukraine, Siberia); by 1933 more than 5 500 kulak families had been deported beyond the borders of the republic; in the course of the ”cleansing” of the kolkhozes of ”class enemies” more than 60 000 further dehkans were repressed. The ruin of agriculture caused a famine that ended only in 1935.

The cotton monoculture: in 1933 cotton accounted for 81.5% of all the agricultural produce of the republic, by 1937 — 93.4%; in 1940 Uzbekistan supplied 63% of the all-union cotton, which ”freed the USSR from cotton imports” (in 1925 the USSR imported 103 100 tonnes of cotton, by 1932 — only 24 300 tonnes). The positive side: by 1940 gross agricultural output had grown by 130% relative to 1924, the sown areas $+50$%, the livestock from 734 000 to 1 693 100, the tractors from a few to 24 200.

The Four Phases of Soviet Repression in Uzbekistan (mandatory table!)

Phase 1 — the 1920s — early 1930s: the rollback from the NEP; the victims — resistance, the national intelligentsia, politicians of alternative forms of development. Accused of nationalism: K. Atabayev, T. Ryskulov, A. Rahimbaev, N. Tyurakulov, I. Khidiraliyev, S. Khodzhanov; the cases of Inogamov, the ”Group of 18”, Kasymov were fabricated; at the end of 1929 the members of the underground ”Milliy Istiqlol” headed by the philosopher Munavvar Qari were arrested (85 people: 15 shot, the rest — to the camps); the members of ”Milliy E’tiqod” (Mannan Ramiz, Nasir Saidov, Batu, Hosil Vosilov, Sobir Kadyrov) were sentenced to death or to long terms.

Phase 2 — 1936–1939 (”The Great Terror”): the cases of Fayzulla Khodjayev (chairman of the Council of People’s Commissars), A. Ikramov (first secretary of the Central Committee of the CP(b) of Uzbekistan), S. Segizbayev, A. Karimov, A. Islamov, M. Tursunkhodjayev were fabricated — all were shot. By the spring of 1938 more than 70% of the leaders of the republic had been repressed. In 1937–1939 alone the ”troikas” of the NKVD (tribunals for ”counter-revolutionaries”) imprisoned more than 41 000 people, of whom 6 920 were shot. The national intelligentsia was destroyed: Abdulla Qodiriy, Abdulhamid Chulpon, Abdurauf Fitrat, Shakir Sulayman, Ziya Said, Elbek, Agzam Ayub, Usman Nasyr, Kasym Sorokin, Muhammad Hasan, Abdusalom Niyazi, Atojan Hashimov. The first Uzbek professor of history, Pulat Saliev, was killed. In total, in 1937–1953 almost 100 000 people were repressed, of whom 13 000 were shot.

Phase 3 — 1946–1953: repression against the intelligentsia, financiers and participants of the war (until the death of Stalin).

Phase 4 — 1983–1985 (the ”Cotton Affair” / ”Uzbek Affair”, only for Uzbekistan): a campaign of ”socialist cleansing” and of the struggle against corruption, in which the blame for economic failures was placed on local cadres; the mass media of the USSR presented corruption as having engulfed the whole nation, which insulted national dignity. The investigative groups of Gdlyan and Ivanov applied the methods of Stalin and Beria: beatings, unlawful arrests; in total more than 25 000 leaders and economic managers of Uzbekistan were arrested.

Literacy and Deculturation

The contrasts of the epoch: literacy grew from ~{}11% (1928) to 68% (1939); in 1940 — 5 504 general-education schools and 1 368 800 pupils (against 82 300 in

1924); compulsory primary education was introduced and the transition to universal seven-year schooling began; in 1928 industry had 1 400 engineers and technicians, by 1940 — 6 000; as of 1 January 1941 the republic had 55 300 specialists with diplomas (20 200 with higher and 35 100 with secondary specialised education).

The negative side: the change of writing systems led to a new wave of illiteracy; private schools were liquidated; prison terms of 10–15 years for publication in the Arabic script; the imposition of Soviet rites; the harm of accelerated ”internationalisation”; the curtailment of the appointment of national cadres; a culture ”socialist in content, internationalist in spirit, national in form”; the alienation of the people from their thousand-year spiritual heritage and the destruction of historical memory. Language policy: in 1938 — the compulsory study of Russian in national schools (a reduction of the hours of the native language); in 1940 the Cyrillic script was introduced by decree; Russian was raised to the level of the state language.

Migrations and Centralisation

A policy of the artificial increase of the multinational composition of the republics: forced and uncontrolled voluntary resettlement. The first deported — the Koreans of the Far East, the Germans of the Volga region, the Poles of western Ukraine and Belorussia. Between September and December 1937 more than 74 500 Koreans arrived in Uzbekistan. In 1943–1944 — political exiles from the North Caucasus, from Georgia and from Crimea: about 110 000 Meskhetian Turks from Georgia and 151 424 Crimean Tatars from Crimea.

Uzbekistan remained strictly subordinate to the centre: under Article 17(c) even the establishment of borders and the division of regions into districts were subject to approval by the Supreme Soviet of the USSR.

The Contribution to the Victory over Fascism (figures for tests!)

1 433 230 people took part in the war — more than 40% of the able-bodied population of the republic; 263 005 were killed, 132 670 went missing in action, 395 795 did not return, 60 452 became invalids. About 120 000 soldiers were awarded orders and medals; the title of Hero of the Soviet Union was received by 280 people, of whom 75 were Uzbeks.

Industry was put on a war footing; more than 100 enterprises were evacuated and housed from Russia, Ukraine and Belorussia. More than 1 million evacuees from the occupied districts were received, including 200 000 children; orphanages were opened, and many children were adopted by Uzbek families. During the war years two volumes on the life and work of Alisher Navoi were published, together with works of the classics (Lutfi, Bedil) and the poems ”Shirin and Shakar”, ”Kunduz and Yolduz”, ”Dalli”, ”Muradkhan”, ”Malika ayor”; creative work was done by Aibek, Aydin, S. Ahmad, Hamid Alimjan, Gafur Ghulam, Mirtemir, Shaykhzade, Zulfiya and others.

After Stalin: the Losses of the Republic

De-Stalinisation and the rehabilitation of the victims of political genocide; the general approach to national policy changed little. The important role of Sharaf Rashidov; from the 1960s to the early 1980s dozens of large industrial enterprises were opened: by 1985, 1 549 enterprises of machine-building, chemistry, construction, light industry and the agro-industrial branches were functioning; irrigation canals — 197 000 km, 23 reservoirs for 10 billion cubic metres of water.

The losses: the specialisation of a raw-material supplier; in the 1980s the annual deliveries of gas exceeded 250 billion cubic metres, of gold — more than 50 tonnes; a

continuous flow of cobalt, molybdenum, tungsten, refined copper, uranium; minerals worth ~{}5.5 billion dollars a year. The revenues from the sale of gold and rare metals did not reach the treasury of Uzbekistan: in the last 15 years of the USSR, ”cotton and gold” worth no less than 35 billion dollars were taken away for the needs of the centre, and the total value of the minerals delivered to the central regions exceeded 75 billion dollars. The cotton monoculture and the uncontrolled use of the waters of the Amu Darya and the Syr Darya led to the tragedy of the Aral Sea.

Perestroika and the Path to Independence

”Perestroika”, proclaimed by M. Gorbachev in April 1985 — the hope of an exit from the systemic crisis; the ”new thinking” in foreign policy for the sake of ”universal human values” and ”a world without violence and war”. National movements were born with demands for democratic reform and genuine sovereignty, for the rebirth of national consciousness and the restoration of national statehood. The wave of demonstrations of 1989 swept through Fergana, Kokand, Kuvasay, Gulistan, Parkent and Buka.

Islam Karimov, elected president at the first session of the XII convocation of the Supreme Soviet of the Uzbek SSR (March 1990) — an unprecedented step: before this, not a single union region had elected a president; the centre reacted extremely negatively. The idea of political sovereignty and economic self-reliance was advanced as the decisive conditions of independence: in 1989 the Uzbek language was given the status of the state language; measures were taken to liquidate the cotton monoculture and to restore spirituality; August 1989 — the resolution on personal subsidiary plots; the beginning of 1990 — the employment programme; July 1990 — the decree on improving the water supply and the gasification of the countryside.

The ”Declaration of Independence” was adopted at the second session of the Supreme Soviet of Uzbekistan (18–20 June 1990, XII convocation; 12 articles). It enshrined: the supremacy of the democratic state and of the laws throughout the whole territory; the independent resolution of internal and foreign-policy questions; the recognition of and respect for the basic principles of international law; the determination of one’s own path of development, and more.

19 August 1991 — the last attempt to preserve the USSR: an unconstitutional coup d’état, the creation of the GKChP (State Committee for the State of Emergency), the isolation of Gorbachev; the visit of I. Karimov to India was interrupted. The emergency 6th session of the XII convocation adopted the Statement of the Supreme Soviet on the independence of Uzbekistan and the Law ”On the Foundations of the State Independence of the Republic of Uzbekistan”. 31 August 1991 — independence was proclaimed; by the resolution ”On the Proclamation of the State Independence of the Republic of Uzbekistan” 1 September was declared Independence Day and a day off beginning with 1991.

The textbook adds: the referendum on independence (a test of the people’s support) and the first nationwide elections of the President; the Constitutional Law ”On the Foundations of State Independence”, the state symbols (emblem, flag, anthem) and the national currency — the basic attributes of sovereignty (topic 4 of the textbook).

5.2 Savollar — lecture questions with model answers

S1. What was the main idea behind the creation of new republics in the Soviet Union?

Answer. The idea of nation-building: the creation of national republics on the linguistic principle in order to build ”homo sovieticus” — a person who thinks, behaves and

lives in the Soviet way. Peoples living in one locality were separated by languages; instead of centuries-old traditions, moderate ”Soviet” values were imposed with a preference for the traditions of non-Muslim societies; the republics were created without sovereignty, under the ideological homogenisation of the CPSU.

S2. Why did the Soviet Union pursue a harsh repressive policy?

Answer. Repression was an instrument of building homo sovieticus and of suppressing any resistance: physical reprisal against the intelligentsia and influential people facilitated the ”watering” of Soviet ideology; intimidation maintained the loyalty of the poor, from whom the property of the rich was nationalised; the four phases of repression (the 1920s — early 1930s; 1936–1939 ”The Great Terror”; 1946–1953; 1983–1985 the ”Cotton Affair”) sowed fear and destroyed alternative thinkers and national elites.

S3. What was the main contribution of the population of Uzbekistan to the Second World War?

Answer. 1 433 230 conscripted (more than 40% of the able-bodied), 263 005 killed, 132 670 missing in action, 395 795 who did not return, 60 452 invalids; ~{}120 000 decorated, 280 Heroes of the Soviet Union (75 Uzbeks). The supplying of the front with weapons, ammunition, uniforms and food; the housing of more than 100 evacuated enterprises; the reception of more than 1 million evacuees, including 200 000 children; orphanages were opened, many children were adopted.

S4. What was the intellectual and scientific development in the Soviet period?

Answer. Contradictory: the growth of literacy from 11% to 68% (1928–1939), a network of schools (5 504 in 1940), specialists (55 300 by 1941), high poetry, drama and prose inspired by the Jadids (Aibek, Alimjan, Gafur Ghulam, Mirtemir, Shaykhzade); the Academy of Sciences was opened in the war years because of the evacuation of scholars. But: the persecution of the intelligentsia, the change of alphabets, prison terms for the Arabic script, ideological contradiction, the destruction of the school of history (the arrest of the first professor of history, Pulat Saliev).

S5. How were the natural resources of Uzbekistan distributed for the people of Uzbekistan?

Answer. The republic was not the real master of its resources: all the revenue from gas, gold and rare metals was controlled by the union centre. In the 1980s: gas > 250 billion cubic metres and gold > 50 tonnes annually; minerals worth ~{}5.5 billion dollars a year; in the last 15 years of the USSR, ”cotton and gold” worth $35+$ billion and minerals worth $75+$ billion dollars were taken out — while Uzbekistan was criticised for corruption and low productivity. The revenues did not enter the treasury of the republic.

S6. What changes took place in the period of perestroika?

Answer. April 1985 — the proclamation of perestroika by Gorbachev and the ”new thinking”; glasnost weakened the ideological yoke; national movements for sovereignty were born; the demonstrations of 1989 (Fergana, Kokand, Kuvasay, Gulistan, Parkent, Buka); the election of I. Karimov as president (March 1990); the Uzbek language — the state language (1989); the Declaration of Independence (June 1990, 12 articles); the GKChP on 19 August 1991 and the proclamation of independence on 31 August 1991.

5.3 Testlar — lecture tests with correct answers

T1. What concept was advanced by the Soviets for the formation of new countries in Central Asia?

a) communism b) nation-building c) aristocracy d) repression Answer: b) nation-building

Explanation: The Soviet state created national republics on the principle of nation-building (1924).

T2. What system was created by the curtailment of the NEP (New Economic Policy)?

a) the bureaucratic command system b) war communism c) repression d) nationalisation Answer: a) the bureaucratic command system

Explanation: Key of the test: the bureaucratic command system (the return to the methods of war communism after the NEP).

T3. What is a ”troika”?

a) tribunals of three persons for ”counter-revolutionaries” b) a kolkhoz of three villages c) three-faced governance of the country d) meetings on all problems Answer: a) tribunals of three persons for ”counter-revolutionaries”

Explanation: The ”troikas” of the NKVD — three-person tribunals for ”counter-revolutionaries”: 41 000 imprisoned, 6 920 shot (1937–1939).

T4. Which factor caused enormous damage to agriculture?

a) repression b) industrialisation c) evacuation d) collectivisation Answer: d) collectivisation

Explanation: Forcible collectivisation: dekulakization, famine until 1935, the loss of livestock.

T5. How many tonnes of gold were mined in Uzbekistan in the 1980s?

a) 30 t b) 40 t c) 50 t d) 60 t Answer: c) 50 t

Explanation: More than 50 tonnes a year (plus gas > 250 billion cubic metres).

T6. What is the ”Uzbek Affair” / ”Cotton Affair”?

a) the export of cotton b) the cotton monoculture c) mass arrests of people connected with cotton-growing d) the construction of cotton factories Answer: c) mass arrests of people connected with cotton-growing

Explanation: The campaign of 1983–1985: Gdlyan and Ivanov, more than 25 000 arrested leaders.

5.4 Atamalar — weekly glossary

Term (atama)	Meaning
Homo sovieticus	”Soviet man”: thinks, behaves and lives only in the Soviet way; the goal of Soviet upbringing
Nation-building	the creation of national republics on the linguistic principle without sovereignty
NEP	the New Economic Policy; its curtailment brought back the methods of war communism
War communism	emergency methods of managing the economy of the period of the Civil War
Bureaucratic command system	a system of governing society created by the curtailment of the NEP
Collectivisation	the forcible unification of dehkan households into kolkhozes; the cause of famine
Dekulakization	the confiscation of property and the deportation of ”kulaks”: 40 000 households (1930–1933)
Cotton monoculture	the one-sided orientation of agriculture to cotton: 93.4% of output by 1937
Industrialisation	the creation of industry; in Uzbekistan — predominantly raw-material and agro-technical
Repression	a policy of terror; 4 phases in Uzbekistan: the 1920s — early 1930s, 1936–1939, 1946–1953, 1983–1985
The Great Terror	the phase of 1936–1939: > 70% of the leaders repressed by the spring of 1938
Troika of the NKVD	a three-person tribunal for ”counter-revolutionary” affairs
Milliy Istiqlol	the underground organisation ”National Independence” (arrests of late 1929, head Munavvar Qari)
Milliy E’tiqod	the movement ”National Faith”; its members were sentenced to death / long terms
Deculturation	the destruction of national culture: the change of writing, the imposition of Soviet rites

Term (atama)	Meaning
Korenizatsiya	the advancement of local cadres (the early 1920s); curtailed by the end of the 1920s
”Socialist in content…”	the formula of culture: ”socialist in content, internationalist in spirit, national in form”
Cyrillisation of 1940	the introduction of the Cyrillic script for the Uzbek language by decree
Deportations	74 500 Koreans (1937), ~{}110 000 Meskhetian Turks, 151 424 Crimean Tatars (1943–1944)
Evacuation	the housing of > 100 enterprises and 1 million people (including 200 000 children) in 1941–1942
Hero of the Soviet Union	the highest title: 280 people from Uzbekistan, of whom 75 were Uzbeks
Sharaf Rashidov	the leader of the republic (1959–1983): industrial growth, irrigation, patronage of culture
The Aral tragedy	a consequence of the uncontrolled withdrawal of the waters of the Amu Darya and the Syr Darya for cotton
Perestroika	”reconstruction”, proclaimed by Gorbachev in April 1985
”New thinking”	the foreign-policy doctrine of ”universal human values”
Cotton Affair	the ”Uzbek Affair” of 1983–1985: Gdlyan and Ivanov, > 25000 arrested
Declaration of Independence	adopted on 18–20 June 1990, the II session of the XII convocation, 12 articles
GKChP	the State Committee for the State of Emergency; the coup of 19 August 1991
The Law ”On the Foundations of State Independence”	adopted by the emergency 6th session on 31 August 1991
1 September	Independence Day of the Republic of Uzbekistan (since 1991)
Referendum on independence	a nationwide vote in support of independence (December 1991)
The ”Uzbek model” / five principles	one’s own path of development (terminology of topic 4 of the textbook)
State symbols	the emblem, flag, anthem — attributes of sovereignty under the Constitutional Law

6 The 2024 textbook: savol va topshiriqlar and tayanch so‘zlar

The textbook «Ўзбекистоннинг энг янги тарихи» (2024) is structured by topics (mavzu); at the end of each topic there are key words (tayanch so‘zlar) and a block «Mavzu yuzasidan savol va topshiriqlar» — questions and assignments on the topic. Below these blocks are given in full for the four topics mapped to weeks 1–4 of our course: topic $1 \to$ week 1, topic $2 \to$ weeks 2–3, topics $3-4 \to$ week 4. The English translation is for preparation; in the exam the wordings may be used in their original form.

6.1 Topic 1. The discipline «The Newest History of Uzbekistan»: subject, aim and tasks (→ week 1)

Tayanch so‘zlar (key terms of the topic)

Original: Fanning predmeti va obyekti; o‘quv jarayoni; O‘zbekiston; tarix; eng yangi tarix; mustaqillik; ijtimoiy fanlar; inson omili; millat o‘tmishi; tarixiy makon; voqea-hodisalar; inson va tabiat; tarix falsafasi; mentalitet; metodologiya; ilmiy-nazariy asoslar; usullar; tamoyillar; ijtimoiy zaruriyat; nazariya; sivilizatsion yondashuv; metodologiya tamoyillari; davrlashtirish; yordamchi fanlar; madaniy meros; fanning ahamiyati va vazifalari.

Translation: subject and object of the science; the learning process; Uzbekistan; history; the newest history; independence; social sciences; the human factor; the people’s past; historical setting; events; humans and nature; philosophy of history; mentality; methodology; scholarly-theoretical foundations; methods; principles; social necessity; theory; the civilizational approach; principles of methodology; periodization; auxiliary disciplines; cultural heritage; significance and tasks of the science.

Mavzu yuzasidan savol va topshiriqlar (original)	Translation and model answer
1. O‘zbekistonning eng yangi tarixi fanining fan sifatida tutgan o‘rniga baho bering.	Assess the place of the newest history of Uzbekistan as an academic discipline. Model answer: the newest history is an independent social science studying the socio-political, economic and spiritual processes of the period of independence; it shapes the historical consciousness of young people, explains the roots of the contemporary reforms and holds a key place among the social sciences.
2. O‘zbekistonning eng yangi tarixi fanining predmeti va obyekti haqida nimalarni bilasiz?	What do you know about the subject and object of the newest history of Uzbekistan? Model answer: the object is Uzbek society in the period of the newest time (from Soviet dependence to independence); the subject is the regularities of the socio-political, economic, cultural and spiritual transformations of that period.
3. O‘zbekistonning eng yangi tarixi fanining usullari va tamoyillari haqida nimalar deya olasiz?	What can you say about the methods and principles of the newest history of Uzbekistan? Model answer: methods — historicism, chronological, comparative, statistical, retrospective; principles — scholarly rigor, objectivity, the civilizational approach, the priority of the human factor.
4. O‘zbekistonning eng yangi tarixini davrlashtirishda nimalarga asosiy e’tibor berish lozim?	What should one pay attention to when periodizing the newest history of Uzbekistan? Model answer: the change of the forms of statehood, the stages of colonial/Soviet dependence and independence, qualitative shifts in the economy, society and spiritual life.
5. Metodologiya nima? Tarix falsafasining mohiyati nimada?	What is methodology? What is the essence of the philosophy of history? Model answer: methodology is the doctrine of the system of methods and principles of scientific cognition; the philosophy of history comprehends the meaning, the driving forces and the direction of the historical process.
6. O‘zbekistonning eng yangi tarixini o‘rganishdagi manbalar haqida ma’lumot bering.	Give information on the sources for studying the newest history of Uzbekistan. Model answer: archival documents, legislative acts, periodicals, statistics, memoirs, oral history, material and visual sources.
7. O‘zbekistonning eng yangi tarixini o‘rganishda yordamchi fanlar haqida qanday fikr bildirasiz?	What is your opinion on the auxiliary disciplines in studying the newest history? Model answer: archaeology, numismatics, chronology, source studies, ethnography, sphragistics, etc. provide the critical verification of written sources and their supplementation.

Mavzu yuzasidan savol va topshiriqlar (original)	Translation and model answer
8. O‘zbekistonning eng yangi tarixini o‘rganishning ahamiyati nimada?	What is the significance of studying the newest history of Uzbekistan? Model answer: understanding the roots of the present day, fostering patriotism, forming an objective picture of the reforms, developing critical thinking.

6.2 Topic 2. The historical foundations of independence: civilization, statehood, Jadidism (→ weeks 2–3)

Tayanch so‘zlar (key terms of the topic)

Original: O‘zbekiston; mustaqillik; sivilizatsiya; davlatchilik; jahon; millat; xalq; qahramon; O‘rta Osiyo; Movarounnahr; Turkiston; Rossiya imperiyasi; To‘maris; Shiroq; Spitamen; Jaloliddin Manguberdi; Amir Temur; Jadid; jadidchilik; Xorazm jadidchiligi; ma’rifatparvarlik; maktab; yangi usul maktabi; jadid maktabi; rus-tuzem maktabi; gazeta; matbaa; yangi tuzim; ziyoli; domulla; xonning homiyligi; qozikalon xayrixohligi; «Vaqt»; «Ittifoq»; «Vaxdat»; «Tarjimon»; o‘ng va so‘l oqim; Ismoilbek Gaspirali-Gaspirinskiy; Mahmudxo‘ja Behbudiy; Munavvarqori Abdurashidxonov; Fitrat; Abdulla Avloniy; Abdulla Qodiriy; Ahmad Zaki Validiy; Hamza Hakimzoda; jadidchilik harakati tarixi.

Translation: Uzbekistan; independence; civilization; statehood; world; nation; people; hero; Central Asia; Transoxiana; Turkestan; the Russian Empire; Tomyris; Shirak; Spitamen; Jaloliddin Manguberdi; Amir Timur; Jadid; Jadidism; Khorezm Jadidism; enlightenment; school; new-method school; Jadid school; Russian-native school; newspaper; printing house; the new order; the intelligentsia; domulla; the khan’s patronage; the qozikalon’s goodwill; «Vaqt», «Ittifoq», «Vaxdat», «Tarjimon» — periodicals; right and left currents; Ismoilbek Gaspirali-Gaspirinskiy; Mahmudxo‘ja Behbudiy; Munavvarqori Abdurashidxonov; Fitrat; Abdulla Avloniy; Abdulla Qodiriy; Ahmad Zaki Validiy; Hamza Hakimzoda; history of the Jadid movement.

Mavzu yuzasidan savol va topshiriqlar (original)	Translation and model answer
1. Sivilizatsiya deganda nimani tushunasiz?	What do you understand by civilization? Model answer: see week 2 — a «society of cities» with a developed culture, technologies, governance and social norms.
2. O‘zbek xalqining kelib chiqishi haqida nimani bilasiz?	What do you know about the origin of the Uzbek people? Model answer: formation on the basis of the ancient agricultural population of the oases (Sogdians, Khorezmians, Bactrians) and of nomadic Turkic-speaking tribes; the final stage — the resettlement of the Dasht-i-Kipchak Uzbeks into Transoxiana in the 15th–16th centuries under the Shaybanids.
3. Davlatchilik nima?	What is statehood? Model answer: see week 3 — the transformation of tribal forms into legal structures under a ruler and a system.
4. Ilk davlatlar to‘g‘risida qanday ma’lumotga egasiz?	What information do you possess about the first states? Model answer: Bactria, Sogd, Khorezm, Dayuan; see week 3.

Mavzu yuzasidan savol va topshiriqlar (original)	Translation and model answer
5. O‘rta asrlardagi buyuk siymolar haqida nimalarni bilasiz?	What do you know about the great figures of the Middle Ages? Model answer: Imam al-Bukhari, Imam at-Tirmidhi, al-Biruni, Ibn Sina, al-Khwarizmi, al-Farghani, Navoi, Babur, etc.
6. Amir Temur milliy qahramon deyilganda qanday taassurotga ega bo‘lasiz?	What impression arises when Amir Timur is called a national hero? Model answer: the unifier of the country, the patron of science and architecture, the creator of a centralized state; the Soviet negative interpretation was revised in the years of independence (see week 1).
7. Temuriylar sulolasi haqida nimalarni bilasiz?	What do you know about the Timurid dynasty? Model answer: 1370–1507; Transoxiana and Khorasan; the flourishing of science and culture — Ulugbek, Navoi, Babur; the Timurid Renaissance heritage.
8. Jadidchilik harakatining asosiy maqsadlari nimalardan iborat bo‘lgan?	What were the main goals of the Jadid movement? Model answer: national awakening, enlightenment, new-method schools, freedom, reforms; ultimately — the independence of Turkestan.
9. Ismoilbek Gaspirali jadidchilik harakati paydo bo‘lishida qanday o‘rin tutgan?	What was the role of Ismoilbek Gaspirali-Gaspirinskiy in the emergence of Jadidism? Model answer: the ideologue of «Jadidism» (from «usuli jadid» — the new method), the newspaper «Tarjimon» (Bakhchisaray), the ideas of the unity of the Turkic peoples and the modernization of education.
10. «Sho‘roi Islom» va «Sho‘roi Ulamo» qachon tashkil topdi?	When were «Sho‘roi Islom» and «Sho‘roi Ulamo» created? Model answer: 1917 — national political organizations of the Turkestan region (Sho‘roi Islom — April 1917, Tashkent; Sho‘roi Ulamo — June 1917).
11. Jadidchilik harakatida dunyoviy oliy ta’lim g‘oyasi qanday kechdi?	How did the idea of secular higher education unfold in the Jadid movement? Model answer: sending young people to Istanbul, Berlin, etc.; the creation of university groups; educational societies («Tarbiyai aftol» 1910, «Kumak» 1909, «Dorilu ojizin» 1913).
12. Jadid siyosiy maxfiy tashkilotlarining soni, shulardan birortasiga to‘xtaling.	The number of secret political organizations of the Jadids; dwell on one of them. Model answer: «Padarkushlar» (1907), «Ma’rifat» (1910), «Ittifoq» (1912), «Milliy Istiqlol», etc.; for example, «Ma’rifat» — Samarkand, enlightenment and reform aims.

6.3 Topic 3. Socio-political processes in Uzbekistan on the eve of attaining independence (→ week 4)

Tayanch so‘zlar (key terms of the topic)

Original: O‘zbekiston SSR; sovet; syezd; kompartiya; qaramlik; qatag‘onlik; ijtimoiy-siyosiy; iqtisodiy; demografik; urbanizatsiya; madaniy hayot; mafkura; «qayta qurish»; konsepsiya; ekologik fojia; Farg‘ona; Toshkent; Markaz; mustaqillik; deklaratsiya; Prezident; markaziy komitet; sotsialistik; agrar siyosat; sanoat; paxtachilik; xomashyo.

Translation: Uzbek SSR; soviet; congress; communist party; dependence; repressions; socio-political; economic; demographic; urbanization; cultural life; ideology; «perestroika»; concept; ecological tragedy; Fergana; Tashkent; the Center; independence; declaration; President; central committee; socialist; agrarian policy; industry;

cotton growing; raw materials.

Mavzu yuzasidan savol va topshiriqlar (original)	Translation and model answer
1. XX asr ikkinchi yarmidan mustaqillikkacha bo‘lgan davrda O‘zbekistondagi madaniy-ma’naviy qaramlik qanday oqibatlarga olib keldi?	What consequences did the cultural-spiritual dependence of the second half of the 20th century lead to? Model answer: alienation from the national heritage, changes of alphabets, the ideologization of education, the destruction of historical memory.
2. Respublika iqtisodiy hayotidagi bir tomonlik va uning oqibatlarini tushuntirib bering.	Explain the one-sidedness of the economic life of the republic and its consequences. Model answer: cotton monoculture and raw-material specialization; dependence on the Center, the ecological crisis, the lag in processing.
3. O‘zbekistonda kechgan demografik jarayonlarning asosiy xususiyatlari nimalarda namoyon bo‘ldi?	In what did the main features of the demographic processes manifest themselves? Model answer: rapid population growth, a high birth rate, urbanization, migration flows, the overpopulation of the Fergana Valley.
4. Respublikada ekologik holatning keskinlashishi sabablari nimada edi?	What were the causes of the aggravation of the ecological situation in the republic? Model answer: the uncontrolled withdrawal of the water of the Amu Darya and the Syr Darya for cotton; the drying up of the Aral Sea; toxic agrochemicals; salt storms.
5. 1980-yillardagi «Paxta ishi», «O‘zbek ishi» kampaniyalari xususida so‘zlab bering.	Tell about the «Cotton Affair» and «Uzbek Affair» campaigns of the 1980s. Model answer: see week 4 — phase 4 of the repressions, Gdlyan and Ivanov, > 25000 arrested.
6. «Qayta qurish» siyosati va uning O‘zbekistondagi salbiy oqibatlari haqida nimalarni bilasiz?	What do you know about the policy of «perestroika» and its negative consequences in Uzbekistan? Model answer: economic chaos, the aggravation of interethnic conflicts (Fergana 1989), a fall in the standard of living; at the same time — the growth of national self-awareness and of the movement for sovereignty.
