

TASHKENT UNIVERSITY OF TECHNOLOGY

Faculty of Energy Engineering

1. Subject/Module Information

Field	Content
Subject/Module Name	English for Engineering – I
Subject/Module Code	No information for now.
Subject/Module ECTS	4
Academic year	2026 - 2027
Study Semester	Fall (semester 1)
Subject/module type	Mandatory
Program Affiliation	Bachelor of Science for all tracks
Module Coordinator(s)	Ella Tsoy, Florence Dujarric ella.tsoy@tashkenttech-edu.uz , florence.dujarric@tashkenttech-edu.uz

2. Forms of Learning and Teaching

Workload breakdown (30 hrs/ECTS convention):

Component	Hours
Total Classroom Hours	60
Lecture	30
Practical Classes (Laboratory, Workshop)	30
Independent Study	60
Total Workload	120

3. Module Description

This course prepares Foundation students to transition from general high school English to more confident, accurate, and organized everyday and academic communication. It reviews and consolidates core grammatical structures — including the present simple, past simple, present perfect, quantifiers, and relative clauses — and applies them to real communicative tasks such as introducing oneself, describing routines and past events, and writing simple definitions. Students develop their listening, speaking, reading, and writing skills through controlled and communicative activities, progressing from personal and general topics toward evaluating written and spoken language, explaining processes, and delivering short oral presentations. By the end of the course, students will have the general English proficiency and academic communication skills needed to follow their engineering coursework in English and to succeed in the language demands of their degree.

4. Entry Requirements

Field	Content
Prerequisites	No
Co-requisites	No
Additional Remarks	No

5. Intended Learning Outcomes (ILOs)

Each ILO carries a Bloom level and is mapped to ASIIN's four competence dimensions — Subject-specific (Fachkompetenz), Methodological (Methodenkompetenz), Systemic (Systemkompetenz), Social (Sozialkompetenz).

No	Bloom Level	ILO	ASIIN Dimension
1	Understand	Recognize and explain the difference between formal and informal register; the concept of voice as the relationship between the verb and its participants (subject/object); the language of simple definitions; numbers and basic statistical terms; diagram-trend and cause-effect language; and technical/natural process descriptions in lectures and short readings. Additionally, recognize these features when listening to short technical talks or dialogues, identifying key words and overall meaning even when not every word is understood.	Subject-specific
2	Analyze	Analyze simple technical definitions, comparison/contrast structures, key language of technological processes, number types, proportion descriptions, diagram-trend descriptions, and cause-effect relationships in written texts. In parallel, analyze the structure of short spoken presentations or lecture extracts (introduction, sequencing, signposting language, conclusion) to identify how a speaker organizes technical information.	Subject-specific
3	Select	Select the correct register, voice (active/passive), and quantifier for countable/uncountable nouns in a sentence, and justify the choice based on context and function. Select and use appropriate spoken register, fillers, and turn-taking phrases when asking questions, requesting clarification, or contributing to a technical discussion, and justify why a given phrase suits a formal vs. informal exchange.	Methodological
4	Evaluate	Judge which grammatical form, academic vocabulary, and definitions are appropriate in a given written context. Also judge the clarity, coherence, and appropriateness of a short spoken explanation or presentation (own or a peer's), identifying specific points for improvement in pronunciation, structure, or register.	Systemic
5	Apply	Collaborate in small groups on active listening for actions and processes, and on speaking in seminars and discussions: ask and answer questions, express and support an opinion, follow and give simple instructions, and deliver a short structured presentation on a familiar technical topic, responding appropriately to questions from peers.	Social

6. Course Content (Weekly Breakdown)

Week	Topic	Format	Hours
1	Introductions, listening, oral expression - Introducing yourself, your studies and your interests - Diagnostic test - Grammar – Tenses - Listening to a TEDTalk - Interactive oral expression	Lecture + Practical	4

2	Semester planning, grammar and oral expression • Feedback on diagnostic test • Grammar – Tenses • Listening • Interactive oral expression	Lecture + Practical	4
3	Numbers and everyday quantification • Listening • Numbers – Practice • Grammar – Quantifiers • Reading comprehension	Lecture + Practical	4
4	Reading and writing about movement • Grammar – Prepositions • Reading comprehension – Movement and change • Written expression	Lecture + Practical + Test 1	4
5	Describing processes and sequences • Grammar – Passive • Oral expression – Describing a process • Reading – Understanding the description of a process	Lecture + Practical	4
6	Understanding graphs and short talks • Oral expression – Describing simple graphs and charts • Cause-and-effect language • Listening to short talks – Structure and signposting	Lecture + Practical + Quizz 1	4
7	Comparing solutions • Grammar – Noun formation • Reading comprehension • Oral expression	Lecture + Practical	4
8	Mid-term examination • Written exam: reading and language use • Short listening component • Cumulative coverage of Weeks 1–7 (general English)	Midterm Exam	4
9	Understanding and writing simple definitions • Understanding definitions of technical terms • Grammar – Relative clauses • Writing simple definitions using relative clauses	Lecture + Practical	4
10	Introduction to academic lectures and discussion skills • Key vocabulary across Mathematics & Computer Science • Listening to spoken technical explanations • Turn-taking and requesting clarification in a lecture	Lecture + Practical	4
11	Building and understanding technical vocabulary • Key vocabulary across Physics, Chemistry and Materials • Listening to spoken technical explanations • Peer review of short definitions	Lecture + Practical	4

12	Reading and interacting on technical topics • Reading a technical text • Asking and answering questions in small groups • Information-gap listening tasks	Lecture + Practical+ Test 2	4
13	Methodology for technical presentations • Numbers practice • Method of the presentation • Brainstorming – Technical presentation	Lecture + Practical	4
14	Seminar presentations • Preparing a short presentation on a technical topic • Delivering the presentation to peers • Responding to questions from peers • Peer feedback	Lecture + Practical+ Quizz 2	4
15	Review • Consolidation of course content • Practice tasks and exam-skills review • Course feedback and evaluation	Practical	4

7. Independent Study Assignments*

Week	Assignments	Hours
1	Individual reading and activities on the given topics.	4
2	Individual reading and activities on the given topics.	4
3	Individual reading and activities on the given topics.	4
4	Individual reading and activities on the given topics.	4
5	Individual reading and activities on the given topics.	4
6	Individual reading and activities on the given topics.	4
7	Individual reading and activities on the given topics.	4
8	Individual review and preparation for the midterm examination.	4
9	Individual reading and activities on the given topics.	4
10	Individual reading and activities on the given topics.	4
11	Individual reading and activities on the given topics.	4
12	Individual reading and activities on the given topics.	4
13	Individual reading and activities on the given topics.	4
14	Individual listening and activities on the given topics.	4
15	Individual review and preparation for the final examination.	4

***Note:** Independent study assignments for the course (module) should incorporate a variety of learning tasks. At least one-third (1/3) of these assignments should require collaborative learning in small groups.

8. Teaching and Learning Methods

- Lectures
- Seminars / laboratory classes
- Group projects
- Discussions
- Testing (written or computer-based)

9. Assessment Methods and Completion

Component	Examination Type	Duration/Length	Weight (%)	ILOs
Midterm Exam	Paper-based reading and writing tasks	1–2 hours	30	1-4
Test 1	Paper-based writing task	1 hour	10	1,2,3
Test 2	Paper-based writing task	1 hour	10	1,2,3
Quizzes	Paper-based writing task	20 minutes each	20	1,2,3
Final Exam	Paper-based reading, writing and listening test	1–2 hours	30	1-4

Grading and Completion

90-100 points = A - Excellent
75-89 Points = B - Good
60-74 Points = C - Satisfactory
0 - 59 Points = D - Poor

11. Statement on Plagiarism and Academic Dishonesty:

Tashkent University of Technology observes a zero-tolerance policy regarding academic dishonesty. Per university policy as described in the academic catalog, all cases of academic dishonesty will be reported. The following policy will be used for this course:

1. First instances of academic dishonesty will result in a 0 grade on the assignment, but a second attempt may be allowed at the instructor's discretion.
2. Second instances of academic dishonesty will result in a 0 grade on the assignment with no opportunity to reattempt.
3. Third instances of academic dishonesty will result in automatic failure of the course.

12. Statement on the use of AI-tools

Tashkent Tech recognizes artificial intelligence (AI) as a powerful tool for learning, innovation, and skill development. Students are encouraged to use generative AI tools (such as ChatGPT, Claude, DeepSeek or similar platforms) to clarify concepts, debug code, and improve their learning through dialogue (with the AI tools). When used responsibly, AI can serve as a valuable collaborative partner. However, any content generated by AI must be treated as a source, meaning that students must explicitly cite the tool used and clearly document how it assisted you in their workflow, in accordance with each course's specific guidelines.

Academic integrity remains the fundamental principle governing AI use. Students may not submit AI-generated text, code, calculations, or other outputs as their own work unless explicitly authorized by the instructor. All graded assignments, essays, and exams must reflect the student's own understanding and be explainable in detail upon request. The unauthorized or unacknowledged use of AI to complete assignments will result in academic penalties, as stated in the *Statement on Plagiarism and Academic Dishonesty* guidelines.

Attendance Requirements: Per University policy, students must attend at least 75% of class meetings to be allowed to take the final exam. If you miss 25% or more of class meetings, you will not be allowed to take the final exam.
